

SHELF PUSHER SYSTEM keeps products front-facing

When used with Roller Mats our Pusher System creates product lanes to help retailers organize inventory offerings.

Our Pusher System keeps products indexed towards the front near the door, at the point of purchase for easier customer retrieval. Pushers are easily adjusted across the Roller Mat to accommodate different sized products along the same shelf. Heavy Duty spring action keeps the product faced-front but allows easy for restocking by the seller.

Why Choose Nashville Wire?

Global brand development companies partner with Nashville Wire Products for our consistent, premium quality fabrication. We provide the highest quality component parts to our customers who, in turn, provide high quality appliances to their customers. As an integral part of the commercial and domestic appliance supply chain, our products can be found in millions of homes, restaurants and retail stores throughout the country.

We use state-of-the-art technology to build complex, custom, wire shelves and racks that optimize space management and improve functionality of products which we encounter every day. We engineer new solutions that provide durability, strength, performance and perfection.
